

# NEWFOUNDLAND POSTAGE METERS 1928 - 1949

Using adhesive postage stamps created inefficiencies with the growing volume of mail being handled in mailrooms of Newfoundland businesses. To expedite the processing of mail and to help solve employee pilfering of postage stamps, Newfoundland authorized the use of four different postage meter machines for merchants and the GPO during the period of 1928 - 1949.

Type 1	-	Universal Midget	-	page 1 - 5
Type 2	-	Neo-post	-	page 6-29
Type 3	-	Pitney-Bowes model H5	-	page 30-34
Type 4	-	Pitney-Bowes model R	-	page 35-48

Newfoundland meter covers are scarce because they represent less than 15% of the total mail volume. Those with clean impressions and readable meter numbers are harder again for the collector to find.

Significant items are designated with “**L**”  
Items of original research are marked with “*Discovery*”

One of the earliest known Newfoundland meter cover Oct 3, 1928  
Type 1, meter #1 (GvR), United Towns Electric Co. Ltd.
